THE UNIVERSE ENGINEERING

Knowledge From Books to **BYTES**!

It is a digital library that contains technical resources and books for engineering, medicine, business and science fields as well as a database with built-in software tools.

Universe Digital Library (UDL) is a privately owned Malaysian company founded in 2004 that provides science and engineering reference resources via a virtual industry, including handbooks, books, journals, thesis, databases and conference proceedings. Through the activation of interactive productivity tools, users are able to analyze and manage data and to export the data from tables, graphs and equations and export the data to spreadsheets and other data applications.

UDL provides desired information to students and professionals alike. Our collection extensively covers various academic fields like medicine, engineering, science and business extensively. UDL is a comprehensive database that comprises the most carefully selected materials by our esteemed panel of advisers. Our company constantly strives to enhance its database to include new information to better improve our services.

“ Digital technologies have transformed our lives in recent years. Digital literacy has grown exponentially, and digital devices have proliferated personal computers, mobile phones, laptops and mobile wireless devices.”

SUBJECT COLLECTIONS

Adhesives, Coatings, Sealants & Inks
Aeronautic & Aerospace Engineering
Architecture Engineering
Bioengineering / Biomedical Engineering
Ceramics & Ceramic Engineering
Chemical & Environment Engineering
Civil Engineering
Control System Engineering
Electrical & Electronic Engineering
Food & Process Engineering
General & Management Engineering
Highway & Transportation Engineering
Industrial Engineering
Innovation & Design Engineering
Manufacturing & Processing Engineering
Mechanical Engineering
Mechatronics & Robotics Engineering
Metallurgical & Materials Engineering
Microelectronics Engineering
Nanotechnology Engineering
Oil & Gas Engineering
Pharmaceuticals, Cosmetics & Toiletries
Polymer & Rubber Engineering
Software Engineering
Structural & Construction Engineering
Sustainable Energy
Telecommunication Engineering
Textile Engineering

THE UNIVERSE ENGINEERING

Knowledge From Books to **BYTES**!

The Concept

The concept of this digital library is to provide an e-library which contains the whole information desired by people to necessarily acquire and to solve problems. Nowadays, with the availability of Universe Digital Library (UDL), search for information from books, journals, and articles is now easier with just a click.

Furthermore, UDL provides very efficient and time-saving service. Its e-library is accessible 24/7 with no downtime. There is no need to wait for the library door to open at 8:00AM and to rush out before 12:00 PM everyday. With internet connection available, everyone can now do online research anytime and anywhere even at the comforts of our home or desks.

Say goodbye to heavy books! One is able to get a list of book references by just conducting keyword search on a specific topic. Each title has a clickable hyperlink created for full access to the book. It is an amazing, absolutely smart and convenient way to get information for all internet users

Digital Library

Digital library plays a crucial role in any research at higher learning institutions. Many publications are now available online and can be delivered to the end users quickly and conveniently over the Internet. What separates UDL from any other online database is the functionality software that we have embedded into the reference books, helping users find data faster and apply it more productively.

Universe Digital Library is not only an information resource where users may submit queries to satisfy their daily information needs. Indeed, it will present a personalized collaborative Digital Library environment, where users may organize the information space according to their own subjective views and may build communities, while exchanging information and knowledge with other users and get recommendations based on preference of users.

The Vision

The vision of UDL is to create a Malaysian information infrastructure in which the resources of universities, governments, businesses and industries are linked to form a cohesive national digitized information service. This service will provide seamless access to sources across different systems using a variety of formats, and thereby achieve cost-effective development of a more competitive Malaysian research enterprise. UDL offers win-win situations between UDL and publishers as well.

Knowledge Development

Accessible Information

Why you should use Universe Digital Library?

Really cool built-in software tools that manipulate and analyze information

Eliminates worries about unreliable sources found on the web

Available 24/7/365 from anywhere in the world

Used by scientists, engineers, students, and researchers

Search widest range of online resources by using our interactive search tools

No special software required, just a Web browser and an internet connection

With Thousand engineering books, UDL is the largest online engineering digital library in the world!

Saves your time because it's faster, easier, more reliable and relevant information

Targeted Beneficiaries

Students of various fields that require also comprehensive learning materials

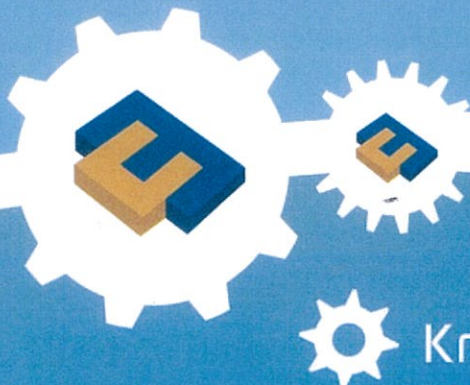

The Internet-savvy youths of today that require easily accessible information

Working adults pursuing lifelong learning

Researchers and professionals who need to access specialist materials

Seasoned professionals seeking to upgrade themselves

Professionals who want to be stimulated
